## **DETAILED ACTION**

### ***Election/Restrictions***

Acknowledgement is made of Applicant's election of the invention of Group I, claims 1-8 without traverse. Claims 1-8 are examined in this Action.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "parameter B". It is not clear what parameter B is.

Claim 1 recites "simulated annealing of chemical potential" It is not clear what this means and no clear definition is noted in the specification.

Claim 5 recites "elements that would contribute", which is confusing because it is not clear as to the nature of the contribution.

Claim 6 recites "at separate values a measure of chemical potential". It is not clear what is meant by this phrase with the use of "a".

Claim 6 recites "step (c)" which is confusing because the independent claim does not contain this step.

### ***Conclusion***

No claims allowed. Closest art found, Resat and Mezei (Biophysical Journal, Vol.71, Sept. 1996, pages 1179-1190, PTO-1449 reference AF) teaches the

identification of binding sites of solvating waters on a molecule comprising conducting annealing of water to a molecule and identifying water binding sites but does not teach the identification of candidate sites for binding ligand molecules.
